3AI Cybersecurity Suite Architecture Whitepaper

STARGATE Corporation / Byeolui Mun Co., Ltd. - 2026

1. Overview

LLM-based threat detection and semantic log analysis automation.
Built from Amazon KDP published security methodology.

2. Core Engines

- Semantic Log Analyzer: unstructured log parsing, APT context
- Autonomous Threat Hunting: natural-language hunting prompts
- One-Click IR Reporting: PDF / Word / HTML in under 10 seconds

3. Pipeline

Ingestion 100k EPS -> RAG Context Mapping -> LLM Kill-Chain Reasoning
-> Automated Response via dashboard, Slack, email, webhook

4. Outcomes vs Rule SIEM

Detection: 45m -> <3m | False positives: 80%+ -> <15%
